EDUCATION

University of Texas at Austin | Austin, TX, USA

August 2026 - May 2028

Master of Science in Information Studies (MSIS - Data Science, Analytics & AI)

Coursework: Language Models & Agentic Workflows, Machine Learning & Statistical Learning, Perspectives on Information

JSS Science & Technology University | Mysore, Karnataka, India

July 2019 - August 2023

Bachelor of Engineering, Computer Science & Business Systems (CSBS)

CGPA: 9.47/10 (3.8/4.0 equivalent)

Coursework: Data Structures & Algorithms, Object Oriented Programming, Artificial Intelligence, DBMS, Operating Systems

WORK EXPERIENCE

The University of Texas at Austin, Teaching Assistant, McCombs School of Business

August 2026 - Present

- Mentoring ~110 honors students on venture ideation and technical feasibility in MAN 327H Innovation & Entrepreneurship, delivering a session on Gen-AI application development, and moderating Canvas discussions alongside in-class facilitation

Target Corporation, Data Analyst, Bengaluru

August 2023 - July 2026

- Delivered \$50M revenue uplift and \$16M in cost savings by architecting a production ML recommendation agent that generated prescriptive actions across 167 business categories, replacing an outsourced manual review cycle
- Scaled an LLM-powered agentic workflow in production across 50+ MBUs to auto-deliver weekly Gen-AI narrative summaries, compressing category manager reporting from 1,800 to 270 annual hours through orchestrated LLM calls governed by structured guardrails and refined via human-in-the-loop RLHF on analyst-scored feedback
- Cut query latency by 30% and served 60+ weekly users by designing optimized HiveQL schemas and PySpark ETL pipelines processing 2B+ records across 1.2M SKUs, embedding anomaly detection at ingestion
- Built self-service BI infrastructure driving a 27% sales lift and \$5.2M incremental Q4 2023 revenue on PlayStation Consoles, including a DOMO dashboard and an automated SSAS-to-Excel pipeline for Merch Finance

Tata Consultancy Services, AI/ML Intern, Bengaluru

June 2022 - September 2022

- Tuned Bayesian optimization pipelines for automated test case generation, processing 1M+ simulation records against ASAM OpenDRIVE and OpenSCENARIO standards to improve scenario diversity and coverage by 15% while cutting development cycle time by 20% across autonomous vehicle simulation and validation workflows

PROJECTS

Sentinel AI: Autonomous Retail Intelligence Agent | [GitHub](#) | [Demo](#)

April 2026 - June 2026

- Architected an autonomous multi-tool AI agent in Python, FastAPI and Llama 3.3 70B (Groq API) coordinating 5 specialized tools for real-time retail monitoring and alerting. Designed a safety-first evaluation methodology decoupling LLM reasoning from arithmetic computation, eliminating hallucination in automated decisions and reducing false-positive alerts to near-zero against a single-threshold baseline, validated via z-score anomaly detection (± 2.0 SD, 95% confidence)

DocCypher: Hybrid RAG Document Intelligence System | [GitHub](#) | [Demo](#)

February 2026 - March 2026

- Built a citation-enforced, page-grounded document Q&A system in Python, FastAPI, React and Llama 3.3 70B (Groq API) to reduce unsupported LLM outputs. Engineered hybrid retrieval (BM25 + dense vector search via ChromaDB, all-MiniLM-L6-v2) with Reciprocal Rank Fusion, benchmarked against BM25-only and dense-only baselines across 30+ queries, and cut peak memory from 1.5GB to under 200MB by migrating to an API-based embedding layer

SnapIQ: Multimodal Document Extraction Agent | [GitHub](#) | [Demo](#)

June 2026 - July 2026

- Built a multimodal AI extraction system in Python, FastAPI and React using a vision-language LLM via OpenRouter to convert business document images into structured JSON, engineering a Pydantic-validated schema with null-handling and a model-agnostic architecture achieving zero-shot extraction across 5+ document schemas with no task-specific training data

TECHNICAL SKILLS

- Languages:** Python, C++, SQL, HiveQL, JavaScript, TypeScript, Bash, HTML/CSS, Data Structures & Algorithms
- AI & ML:** PyTorch, TensorFlow, Scikit-Learn, Hugging Face, Transformers, LangChain, MCP, RAG, RLHF, ChromaDB
- Backend & Data:** FastAPI, REST APIs, Docker, Git, Linux/Unix, AWS, Vercel, PySpark, Pandas, NumPy, ETL Design
- Frontend & BI:** React, Tailwind, Power BI, DOMO, SSAS, Advanced Excel, Statistical Modeling, A/B Testing, Dashboards

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Certified Zone Trainer, JCI India** | 2025-Present | Trained 350+ students across India in Modern Personal Grooming, Ethical Use of AI, Study Techniques, Public Speaking and Interpersonal Skills through multi-session in-person workshops
- President, JCI Mysore Brindavan** | January 2024-December 2024 | Led a 40-member team as President, growing membership by 8% and impacting 400+ lives through wheelchair donations, meal drives and blood donation camps
